Turnitin in Bloomsbury

From eAssessment to
eLearning?

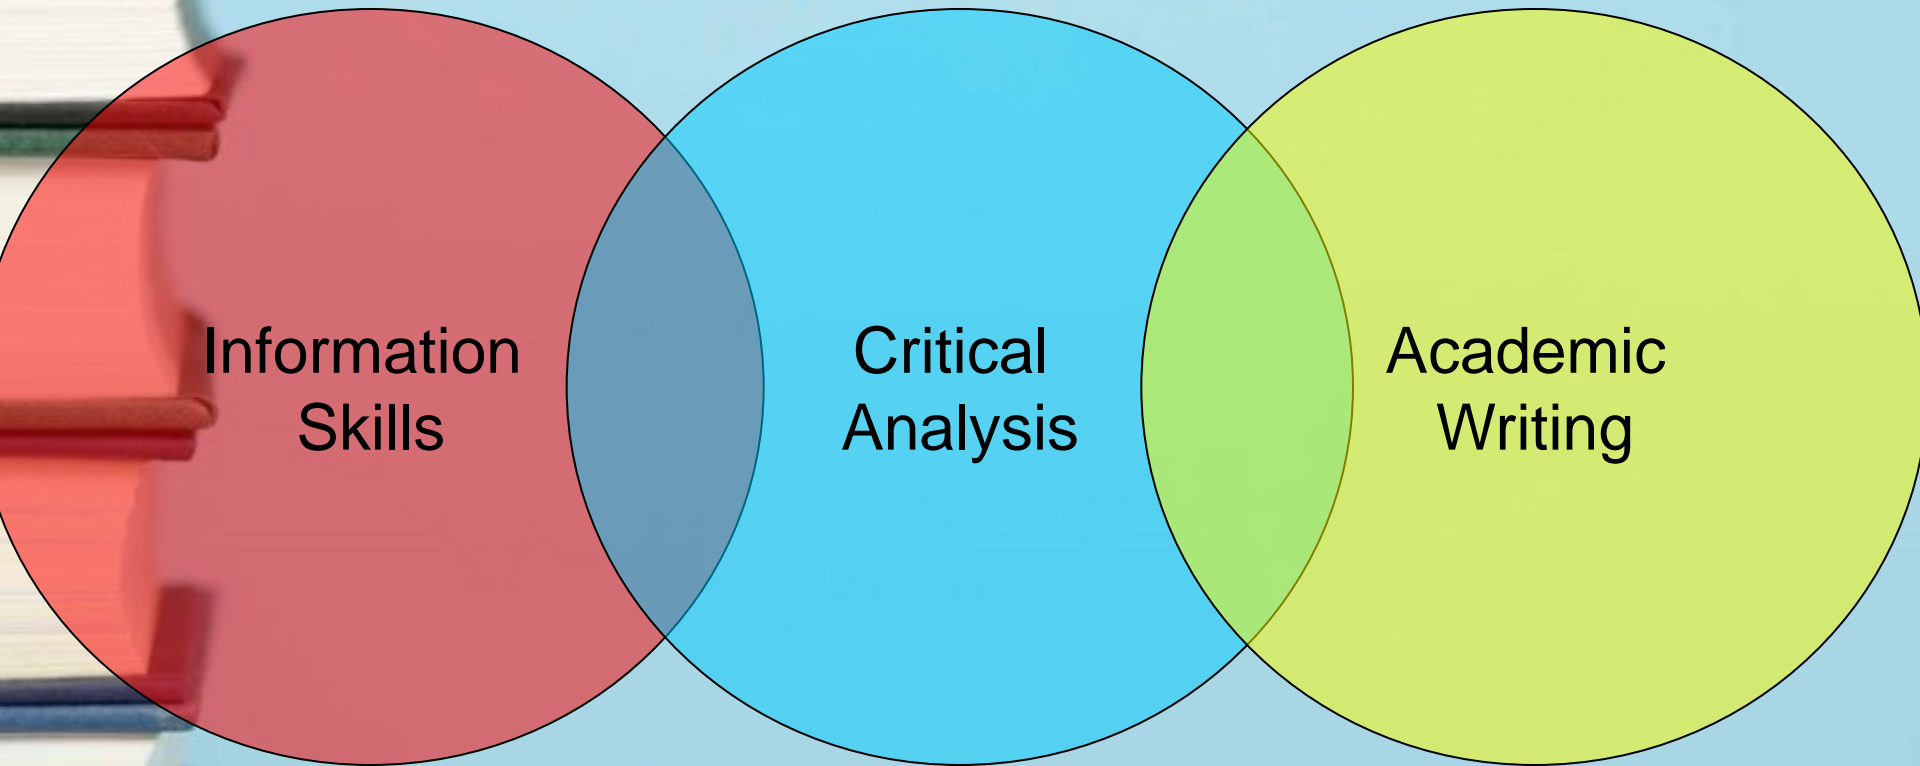

- 
- A stack of several books is visible on the left side of the slide. The books have various colored spines, including red, green, and blue. The pages are white and slightly aged. The stack is positioned vertically, with the top book's pages fanned out slightly.
- [‘A Plagiarism Carol’](#): Plagiarism Awareness Video from University of Bergen

Tackling Plagiarism

- The internet provides easy access to a vast array of information – copy/paste is two clicks
- Possibly more than ever, student skills training needs to incorporate academic honesty

Challenge of joining up skills training

Turnitin in the BLE

- Evolution of Turnitin from 'plagiarism checking' to online submission and online marking with Blackboard integration
- Now used across Bloomsbury in 663 BLE modules
- Mainly electronic submission originality reporting
- Some online marking ('Grademark')

Turnitin in the BLE

- Student guidance notes
- Student feedback is positive (because of the online submission aspect)
- Currently being used as an assessment and 'monitoring' tool - but not really as a learning tool
- Other institutions are experimenting with formative use

About Turnitin and Plagiarism Prevention
